Experience

Senior Front-End Developer, Team Detroit - Dearborn, MI
MAY 2014 - PRESENT

- Rapidly created working prototypes for evaluation and client discussion.
- Used Angular.js to create complex web app prototypes.
- Consulted with UX and design teams about user interactions.
- Iterated over potential interactions and designs based on user testing results and design evolution.

Owner/Creator, Level Up Tutorials - Ann Arbor, MI / Denver, CO
MARCH 2012 - PRESENT

- Wrote, produced and recorded over 650 popular tutorial videos on various topics for Level Up Tuts (www.youtube.com/user/LevelUpTuts) with over 7,500,000 views.
- Designed websites, interfaces, and layouts to fit client's desires including developing responsive layouts to enhance the experience on mobile devices.
- Consulted on large scale development projects.
- Provided dedicated training on coding practices and content management systems.
- Wrote, produced and recorded commercial video tutorial series for Envato and Packt Publishing.

Web Applications Developer, UM Creative - Ann Arbor, MI
OCT 2013 - MAY 2014

- Developed single page applications using Angular.js or Backbone.js.

• Maintained and built websites for secure University servers.
• Took initiative on internal projects to advance direction of department.
• Tested and troubleshot slow application speeds as well as slow front end load times on existing websites.
• Built responsive, CMS based websites with rapid turnaround.

Senior Developer, Q LTD - Ann Arbor, MI
MARCH 2011 - OCT 2013

• Built large, medium, and small scale websites from the ground up using appropriate content management systems (Drupal, Wordpress, Expression Engine, Magento).
• Utilized latest HTML5 and CSS3 technologies to build semantically correct and visually interesting responsive designs.
• Created interactive elements with custom JavaScript and Jquery.
• Worked frequently with clients to train, assist, and troubleshoot their websites.
• Used Sass, Compass, and CoffeeScript to more effectively write clean, fast, and easy to read code.
